TÊXTEIS

Getting things done

Fashion requires a watchful eye on the world, on human behaviour, on what leaves an impression and more than that, on an avant-garde vision. It lives of the streets, of art, of culture, and there it finds its inspiration. These are also the guiding principles for TMS Têxteis work for over 15 years.

At TMS Têxteis we provide global solutions for our clients, ensuring satisfaction at the level of strategic factors such as quantity, quality, price and delivery times. We also establish partnerships to support the brands

(brand builders and logistic support). The focus is continuously on design, conception and development of textile solutions for fashion and merchandising.

We know what drives the market, we understand the needs and we deliver custom solutions that exactly meet those demands.

In one word: flexibility

We have several departments that are evidence of the extended range of our activity, going from the design area to product development, production, quality control, logistics, storage and delivery (pick & pack).

We do everything in our power to provide our clients the best quality and the most reliable service. The company works with a very wide array of raw materials, giving primary focus on fine mixtures of wool, tencel, viscose and other fibres. We use several innovative techniques for dyeing, stamping, washing and finishing.

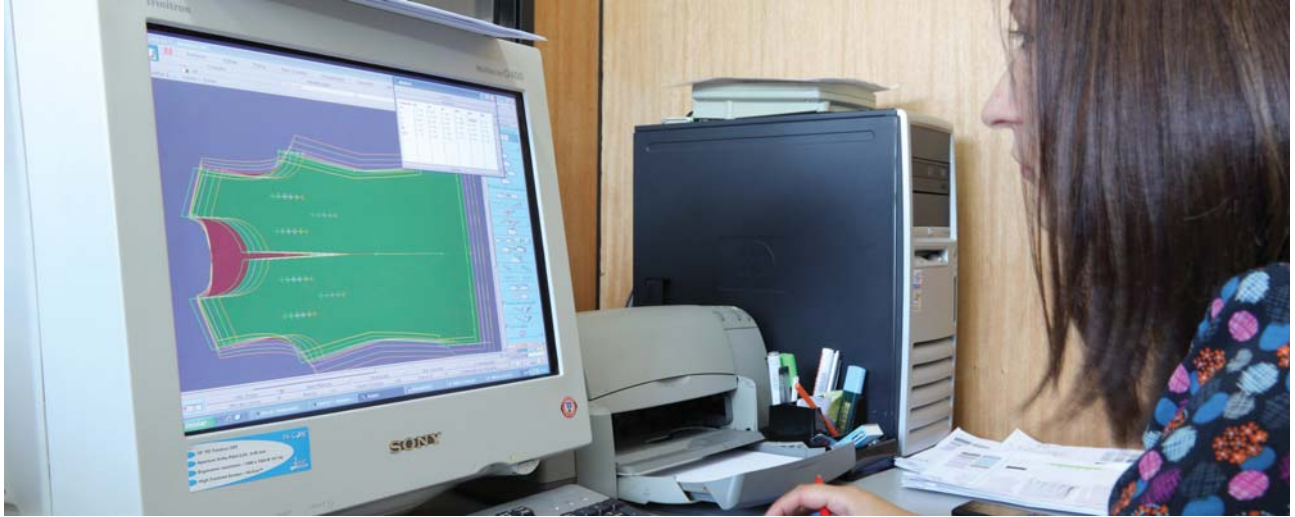

Company Overview

- Since: 1994
- Core business: production of high quality knitted garments at a very competitive price
- Markets: 100% export to EU (United Kingdom, Germany, Denmark, France)
- Monthly production: 50 000 pcs
- Production lead time: 3 to 6 weeks
- Certificates: ÖKO-TEX Standard 100

We have the flexibility to give our clients exactly what they need and we use our capabilities to do it fast, effectively and with excellent prices.

As producers of fashion, TMS Têxteis designs, develops and produces garments, always investing in a dynamic and innovative attitude that makes a difference in an industry of ever increasing demands.

A culture of innovation

To successfully compete we must be better in all areas: quicker, more precise and more efficient. Technology is essential to easily achieve all these goals.

Equipping ourselves with the most advanced technologies as well as an entire team with extensive experience in production and management, we have invested in the latest CAD / CAM and cutting Lectra Systems equipments in the market.

Among other developments we have been able to also assemble a sampling line with equipment capable of producing all kinds of sewing and textile techniques.

By constantly upgrading our technological infrastructure and keeping our employees up to date on the latest innovations we are able to face even the most stringent deadlines and deliver excellent results on schedule.

New technologies applied to the creation and production process are essential to being in the forefront of fashion.

Commitment to quality

Production capacity, technology, equipments and delivery time are important factors in the textile industry and, more often than not, the decision factor on choosing a textile production partner stays with quality or, more specifically, with the quality-price relationship. At TMS Têxteis every one of these aspects is taken under consideration and nothing is left out.

Our sampling line provides that our clients can attest the quality and conformity of the product and compare it with their own

expectations. Experience tells us that giving your best, having confidence in your people and always aiming to higher standards is the best way to surpass those expectations.

We pride ourselves to be an ethical and socially responsible company, in acting in accordance with the labor and environmental standards, ensuring full respect for national legislation and EU recommendations both in the production process as in the relations with partners.

We relish all the different challenges presented by our vast client base. Because each client comes with different needs, we treat each as an individual business partner. This exclusively has contributed to the ever expanding client portfolio.

Beyond Profit

Making a difference has much to do with ideas, with the ability to innovate and anticipate market's needs. That we know, and that is also a special part of our everyday life. However, we also know that today, more than ever, making a difference is also about being aware and socially responsible.

As such, every year TMS Têxteis supports a number of institutions of recognized merit for its social and humanitarian action. It is our way to give back and another chance to make a difference.

We strongly reject to play a merely passive role before society's pressing needs.
